# The Bevco Difference

Backless stools give workers the freedom to move, reposition, and work close to their workstations while taking up less visual and physical space than traditional chairs.

## MORE MOBILITY

Allows users to move and reposition easily throughout the workday.

## SPACE EFFICIENT

A streamlined design works well in compact workstations and production environments.

## EASY TO POSITION

Slide the stool into the workstation when it's time to work and out of the way when it's not.

## Configured for Your Work

Choose from a range of adjustments, heights, arms, bases, and casters.

## Made in Wisconsin

American manufacturing backed by responsive customer support.

## Lower Cost of Ownership

A seating investment designed for long-term value.

# One Stool.
# Countless Work Environments.

### MANUFACTURING

# Maintenance Repair Stools

3057

Maintenance Repair Stools provide workflow conveniences like a tool tray underneath the durable polyurethane seat and a sturdy, steel base that rolls on five 3" polyurethane casters (2 casters include locking brakes). Our Maintenance Repair Stool Series is an ideal choice for use in machine shops, warehouses, and industrial applications—anywhere users bend or crouch down to complete their work.
