# 24/Seven® ESD LockSafe®

## POSITIVE INTERLOCKING TILES WITH ESD PROTECTION!

Static Electricity can produce damaging sparks that can ruin and destroy expensive equipment. 24/ Seven LockSafe ESD eliminates static, while providing an ergonomic worksurface for your team to perform. Made to cover large areas quickly, the 770 ESD can be placed directly atop a conductive coating or floor, eliminating the need for messy grounding cords. For more conventional installations, each tile comes with the grounding snap already installed for use with a grounding cord. The 'positive interlock' technology allows the rubber tiles to lock in, while remaining easy enough to 'unzip' for reconfiguration. Around electronics keeping a work area clean is very important. The Locksafe connection system allows the mat to be rolled up to make keeping a cleaning easier.

- Tiles interlock securely and can be easily reconfigured
- EOS/ESD: Dissipative range-  $1 \times 10^6$  to  $1 \times 10^{10}$
- Grounding snap on each mat
- 3'x 3'(91x91cm) rubber tiles
- Overall thickness 5/8" (15.9 mm)
