Staticide® Conductive Trays

ESD travel protection

ACL Staticide® Conductive Trays provide ESD protection for static sensitive electronic components during handling and transportation. Stackable and durable, ACL's Conductive Trays have excellent abrasion resistance and withstand chemical damage. Made from fiberglass polypropylene with conductive additives, these trays will not outgas or lose electrical properties even after washing. ACL's Dualmat® II Static Dissipative Tray Liners are ideal to use with the Conductive Trays when a dissipative work surface is needed.

Meeting both ANSI/ESD S20.20 and European IEC 613450-5-1 guidelines, electronic components and assemblies can be transported safely.
