

Cleanroom Tape

Cleantack Cleanroom Tape™ is made of low density polyethylene film with pressure sensitive adhesive backing. This low particulate, contaminant free tape is wound on a clean plastic core and individually packaged in heat-sealed bags. Tape is produced and packaged in a class 100 cleanroom.

Tape will adhere to nearly all surfaces including: metal, plastic, and packaging. On most surfaces, tape is easily removable with little to no adhesive transfer.

Use **Cleantack Tape™** in your critical environment for labeling, sealing containers, packaging, and construction projects. The tape has excellent holding power over a wide temperature and moisture range.

Applications: Sealing, packaging, labeling, and color coding bags, bottles, handles, and containers; construction areas and retrofitting in critical environments.

Widths are available in $\frac{1}{2}$ ", 1", 2" and 3". Rolls have 36 yards of tape, rolls per case varies depending on width (see back for case quantities).
